

CASE STUDY

Pitched Metal Sheet ICM Ltd (Co-operative Store)

J Shearer Roofing Ltd was contracted by ICM to carry out roof improvement works at one of their Co-operative stores located in Crown Street, Glasgow.

Prior to being appointed, our qualified and experienced team visited the store and carried out a thorough site inspection and survey of the 500m² roof.

We then submitted a comprehensive cost, scope of works and programme, providing the client all the information required, allowing them to proceed with confidence.

The scope of works included the:

- Erection of necessary scaffolding and edge protection.
- Supply and line existing gutters with new Tor Coatings Elastaseal liquid system.
- Refurbishment of existing metal roof sheets using Tor Coatings raincoat cladding finish.

Located within a busy built up area of Glasgow, our experienced in-house workforce implemented our safe systems of work to successfully overcome challenges relating to Asbestos, Working Height, and Manual Handling.

In addition, we strategically planned for access and security from the outset and established our site set up to prioritise staff and public welfare throughout contract delivery.

Works were successfully completed within a 4-week period.
