

PROJECT EXAMPLE

Greenwood Court

The owners of Greenwood Court had been experiencing ongoing water ingress issues for a long period of time. Upon contacting their local J.Shearer Roofing office we arranged for one of surveyors to call out and assess the ongoing issues.

Upon inspection we found the roof and existing roofline to be beyond repair. Roof replacement was recommended in order to provide the owners with peace of mind for years to come.

We regularly undertake works on multiple owner properties, our excellent communication is vital for these projects in order to keep all parties informed and up to date with progress.

Our scope of works on this project consisted of below,

- ▶ Strip and re-roof using Marley Mendip smooth grey concrete tiles.
- ▶ Replacement leadwork.
- ▶ Roughcasting of chimney heads.
- ▶ Replacement roofline with new uPVC.
- ▶ Replacement rainwater good.

Works were completed in 3 weeks and **10 year guarantee** issued on completion.
